The hat is designed to be worn for long periods without feeling like you've got a mini solar farm on your head. Early reviews from IFA attendees suggest that it's surprisingly comfortable, even with the embedded solar panel. The wide brim offers decent sun protection while giving the solar panel enough surface area to be effective.

I've seen ideas about putting solar cells on cell phones, but there are at least 2 problems (that I can think of right off the bat): 1) a solar panel that small won't draw in enough power. 2) if the phone's in a case or in the shadow of the brim of your hat, it won't get any charge either way.
