South Africa - Solar Energy Market 2024-2028. The South Africa - Solar Energy Market size is forecast to increase by USD 3,742.04 million, at a CAGR of 32.03% between 2023 and 2028. The report includes historic market data from 2018 - 2022. The market is witnessing a growing demand for the growing PAYG model, and the scaling up of renewables in transport.

Your solar sales process must also go through these 4 stages. At each of these stages, a buyer gradually learns about your offering. At "awareness" he has just discovered the most basic details of your solar PV offering.. Then over time he learns the value of solar energy, goes to your website and asks for pricing - going to the next "interested" stage in the funnel.
