These solar-powered portable power stations keep your batteries full during power outages and off-grid campouts.

The table above shows not only the amps and volts, but the gallons per minute (GPM) and pressure (PSI) needed for each pump. Another important specification is the horsepower rating because even a 1/4 HP difference can significantly affect your pump's power consumption requirements.. The GPM and PSI will be discussed later on, but the next segment ...

The batteries provide 12V direct electricity while most domestic equipment runs on 110V or 220V alternating current. The power inverter transforms 12V DC to 110/220V AC, which is compatible with our appliances. When there is no solar power available, some power inverters can charge the batteries when linked to a 110/220V AC source.

Wind power generation and photovoltaic power generation are one of the most mature ways in respect of the wind and solar energy development and utilization, wind and solar complementary power generation can effectively use space and time. The two forms of power...
