The batteries provide 12V direct electricity while most domestic equipment runs on 110V or 220V alternating current. The power inverter transforms 12V DC to 110/220V AC, which is compatible with our appliances. When there is no solar power available, some power inverters can charge the batteries when linked to a 110/220V AC source.

Solar Power Source Details: During the day the connected load is powered by either the battery or the solar panel, with the battery compensating if the solar panel output is insufficient..
