1. Choose a Power Inverter. Your home appliances use alternating current (AC) electricity to run. Unfortunately, batteries generate direct current (DC). You can"t just connect a battery directly to your home circuit board or your appliances. You need to convert the battery power into AC -- commonly known as household electricity.

Store LPLT10010 in a dry place away from direct contact with water. Turn off the ON/OFF total power button of the LPLT10010 and store it within the recommended product storage temperature range. The batteries provide 12V direct electricity while most domestic equipment runs on 110V or 220V alternating current. The power inverter transforms 12V DC to 110/220V AC, which is compatible with our appliances. When there is no solar power available, some power inverters can charge the batteries when linked to a 110/220V AC source.

Solar Power Source Details: During the day the connected load is powered by either the battery or the solar panel, with the battery compensating if the solar panel output is insufficient.. A single solar cell typically generates 0.5V and around 50mA in bright light rated at 45mW.. A 12V solar panel comprises 24 solar cells connected in series capable of providing 1 ...
