What is community solar? Community solar power is an alternative way of powering your home through solar power without installing panels on your property. Investors build community solar panel farms on which homeowners can purchase access to a panel. A homeowner then receives a credit on their electric bill for the amount of power produced by the purchased panel, and the ...

In a word: yes. In most states, it's cheaper to purchase and install solar panels on your roof than continuing to purchase electricity from your utility for the next 25 years (which is the estimated life of solar installations).. Solar panels for mobile homes cost as much as any other roof-top installation, as there is no real special equipment, and you can see some real ...
