In an automotive application I've seen two ceramic capacitors in series to increase safety against shorts. In the extreme case a short could start a fire, and I heard that had happened at least once. ... \$begingroup\$ "Special capacitors designed for AC operation are available, usually referred to as "non-polarized" or "NP" types. In these ...

Safety capacitor requirements in battery management systems (250 VAC X1/X2 safety capacitors, MLCC format with polymer terminations) are almost exclusively ceramic because of the 125 C temperature requirement for the components - a temperature range that has, to date, excluded film dielectrics from participating. Summary and Conclusions

Vishay Safety-Rated RFI Capacitors include film, ceramic disc, and MLCC devices. EMI suppression film capacitors offer high voltage ratings to 480V AC for across-the-line applications. High-reliability AC line-rated ceramic disc capacitors are available in reduced sizes and automotive-grade versions, with the "biased 85/85" accelerated life test qualification.

Safety Certified Capacitors are used in large quantities in telecom applications utilizing RJ11 (standard phone line) connections. These applications include DSL

To address these issues, Murata has developed a range of surface-mountable multilayer ceramic capacitors (MLCCs) with peak DC operating voltages of 1500V and peak AC operating voltages of up to 305Vrms.. The EVA capacitors offer a creep distance of 6 and 10mm, making arcing less likely than in other devices with creep distances of just 4mm.

Ceramic safety capacitors are available in several formats, disc capacitors (both two-terminal the three-terminal) and multilayer ceramic capacitors (MLCCs). Safety MLCCs include X2 and X1/Y2 devices rated for 250Vrms and are available in Class I NPO (COG) and Class II X7R dielectrics.
