The standard diaphragm is shown schematically in Figure 2a. The hole in the diaphragm must have a cylindrical form with a sharp edge at the inlet. The length of the cylindrical part is  $0.005 \leq l \leq 0.02D$ , and for  $m > 0.5$ ,  $l = b/3$ . The diaphragm thickness should be  $b \leq 0.05D$ , but not less than 2.5-3 mm.
