The report provides a strategic analysis of the variable capacitors market in Turkmenistan and describes the main market participants, growth and demand drivers, challenges, and ...

I'm in need of a couple capacitors (0.1uf ceramic and a 220uf electrolytic) and a couple resistors (75ohm) to finish this project I'm working on. Normally I'd just buy them online, but I'd like to just scoop them up and get this done today instead of waiting on shipping. I'm just not sure where to go in Denver for stuff like that.

If you suspect a fake, don't buy 10 and hope for one to work; buy zero and go somewhere reputable. People who sell fake/defective components don't toss a few good ones in with the bad like a lottery. But just to clarify, I'm not saying you should avoid buying on eBay. I buy components on eBay all the time.

Capacitors ranging from as high as 1000uF down to 22pF to accommodate a wide range of project needs, including both ceramic and electrolytic capacitors. ... a DIY enthusiast, or a professional engineer, our wide range of products and services can help you bring your ideas to life. You cannot use a simple voltmeter to check a capacitor's health - especially in circuit. You could use an ESR meter, but I'd say you have some learning to do before you attempt any repairs. I'd advise you take it in for service. You can get a healthy shock from those electrolytic capacitors if you don't know how to check them or drain them.
