We purchase wasted lead acid batteries from scrap metal merchants, End of Life Vehicle (ELV) operators, battery retailers and waste contractors across the UK. All batteries pass through Clarity's own network of hubs. There, our team of experts carry out stringent quality control checks ahead of carefully packing the batteries for export to our European smelters.

rate of lead-acid battery exports from China, which declined at a stable rate after 2016. In 2018, the lead-acid battery export volume for China reached 190.23 million, whereas the import volume was only 10.94 million [16, 17]. This high-trade decit is one of the major causes of the relatively low lead-recycling rate in China.
